Touchline Natural Gas Combi Oven 61
 267700 (AOS061GTG1) Natural Gas Combi Touchline
 Oven 61 - 230V/1ph/50-60Hz

Short Form Specification

Item No. _____

Connection steamer with a high resolution touch screen control panel (translated in 20 languages).

air-o-clima: real humidity control based upon Lambda sensor for consistent results independent from the food load. With hot air cycles air-o-clima exhausts any excess humidity generated by the food. A dedicated steam generator guarantees a continuous supply of fresh steam at all times. Manual injection of water to add additional moisture in the cell.

air-o-flow: fresh air is blown into the oven from the outside, after it is pre-heated it is pulled through the bi-functional fan, guaranteeing cooking evenness.

air-o-clean: built-in cleaning system with four automatic pre-set cycles. Green cleaning functions can be set to save energy (skip drying function), water (reduce water consumption) and rinse aid (skip rinse aid).

Three cooking modes: Manual (cooking cycle, temperature, time and advance features); Automatic - (select family and food type + 3 special cycles-LTC, proofing, regeneration); Programs (recipe selection from page with 1000 free 10-phase programs and search button). Recipes can be saved in a USB key for replication in other ovens.

Automatic pre-heating and pre-cooling. Half power, half speed and pulse ventilation controls. Food probe with 6 temperature sensors (the lowest one drives the cycle). Double-glass door with book-like opening maintains a cool external temperature and incorporates a drip pan to collect excess condensation avoiding wet floors. Halogen lighting in the cooking chamber. Side panels and interior in AISI 304 stainless steel.

Supplied with 5.1 tray rack 1/1GR, 65mm pitch.

Main Features

- **Automatic mode:** choosing family and food type, the oven automatically selects the appropriate cooking climate, temperature and time. Three special automatic cycles available:
 - Low Temperature Cooking cycle (LTC) to minimize weight loss, maximizing food quality for large pieces of meat.
 - Reheating cycle: efficient humidity management to quickly reheat.
 - Proofing cycle: uses the air-o-clima function to create the perfect proofing conditions.
- **Programs mode:** a maximum of 1000 recipes can be stored in the oven's memory, to recreate the exact same recipe at any time. 16-step cooking programs also available.
- **Manual mode:** traditional cooking style by manually selecting the parameters. Traditional cooking cycles available:
 - Dry, hot convection cycle (max. 300 °C): ideal for low humidity baking.
 - Low temperature Steam cycle (max. 100 °C): ideal for sous-vide (vacuum packed) re-thermalization and delicate cooking.
 - Steam cycle (100 °C): seafood and vegetables.
 - High temperature steam (max. 130 °C).
 - Combination cycle (max. 250 °C): combining convected heat and steam to obtain humidity controlled cooking environment, accelerating the cooking process and reducing weight loss.
- **Air-o-clima™:** Lambda sensor controlled automatic humidity adjustment of cooking environment.
- **air-o-clean™** automatic and built-in self cleaning system (4 automatic and 1 semi-automatic cycles).
- **air-o-flow:** fresh air from the outside is directed to the bi-functional fan, becomes pre-heated and then pushed into the cooking chamber to guarantee an even cooking process.
- 6-point multi sensor core temperature probe.
- **Hold function:** provides an impulse ventilation ideal for holding and light pastry.
- Variable fan speed. Radial fan.
- Reduced power cycle.
- USB connection.
- Food safe control monitors the cooking process to comply with HACCP standards. HACCP management to record cooking procedure available upon request.
- Guided descaling function to guide operator during boiler descaling phase (from "Setting" mode).
- MultiTimer function to manage a sequence of up to 14 different cooking cycles, improving flexibility and ensuring excellent cooking results.
- **Integrated Automatic Intensive Cleaning System:** enhanced cleaning parameters and wash arms design to optimize detergent, rinse aid and water use thus obtaining superior cleaning results.
- Sous-vide USB probe to ensure excellent cooking results even with vacuum-packed products (optional accessory).
- **Make-it-mine** feature to allow user to personalize all user main interfaces in the "Setting" mode and block editing and deleting of stored programs.

Secadora T5130, T5130C

Características y ventajas

- El microprocesador Compass Pro[®] ofrece:**
 - pantalla grande con botón selector para fácil selección de programa,
 - selección de idioma,
 - botones de arranque rápido y otras opciones para los programas más frecuentes,
 - paquetes de programa de secado optimizados para Economía, Minuciosidad y Tiempo,
 - programa de servicio para ajuste de parámetros y
 - conexión USB
- Control de humedad residual para lograr un secado preciso con un bajo consumo de energía
- Tambor reversible para reducir el enredado de las prendas grandes
- Tambor de acero inoxidable
- Abertura reversible de la puerta para facilitar la carga y la descarga
- Fácil acceso a las piezas principales desde la parte frontal y trasera para agilizar las tareas de mantenimiento
- La versión de monedas con Ecopower para evitar el sobrecalentado de prendas y consumir menos energía
- T5130C: Para que el funcionamiento sea el óptimo, la temperatura ambiente no debería exceder los 25 °C

Las imágenes mostradas corresponden con representaciones del producto y pueden darse variaciones.

Opciones principales

- Parte frontal de acero inoxidable
- Conexión a sistema de reserva / pago o a un contador de monedas
- Soporte de apilamiento para colocar la secadora T5130 encima de la W555H
- Armazón base de acero inoxidable
- Sistema de condensación incorporado

Especificaciones principales		T5130	T5130C
Capacidad, factor de llenado L22	kg/lb	6/13	6/13

Evaporación	g/min	92.8	48
Energía (kWh/litro) de agua evaporada	kWh/l	0.94	1.00

* A plena carga con prendas de algodón y humedad residual del 30% evaluado basándose en ENS.

Certificados ISO 9001 e ISO 14001, y homologación IP X4.

Manuals, guides and specifications of the User for the Dometic refrigerator RM2310. The database contains 3 Dometic RM2310 manuals (available for visualization or free online download in PDF): manual manual, installation and operational instructions of the manual service, installation and operational instructions. 06-10-2014, 08:19 pm à € #1 bronze member is training date: June 2014 Post: 36 Dometic RM2310 and for the next Noob Questions ... I have a 3-Vie Dometic RM2310. It works well in modalities 110 V. But in mode 12V does not cool down. I had it for a couple of hours and the freezer barely becomes a little cool. He would not even prevent a snickers bar from melting. Is it normal? Is the 12V modality mainly to maintain a refrigerator already cold? The real problem is the propane mode. I can't light it. I followed the steps listed in the owners' manual, but it is not turning on. What passages of problem resolution can I undertake before taking it to a camper service center? Thanks Curt ... € 06-10-2014, 09:11 pm à € #2 Platinum member is registration date: Set 2013 Location: Alaska Messages: 287 Re: Dometic RM2310 you made the propane return after having closed it to try the Hwh switches attempt? temperatures, I don't want to get sick with spoiled food. Also, if you don't already have one, a little fan help to circulate the air and keep the food fresco and open the door only when necessary and close it immediately. For the propane, try to turn on the stove to eliminate the line, then turn off the stove, then try the refrigerator on the propane. È à 06-11-2014, 12:24 È € #4 bronze member is the date of registration: June 2014 Puntations: 36 Re: Dometic RM2310 SI, the propane is on. I illuminated burner and worked well. I think it could be electrical, because I don't even see a spark when I hit the ignire. È à 06-11-2014, 01:52 à € #5 Platinum member is registration date: October 2006 Location: New Brunswick, Canada Posts: 8.815 Re: Dometic RM2310 I think it is more light in my Dometic. No power necessary. Turn on your pressing and holding down a button, then pressing the light button that does something similar to a sound that shoots? À ,06-11-2014, 04:09 È € #6 bronze member is the date of registration: June 2014 Puntations: 36 Re: Dometic RM2310 Sate. I keep the button a button while I push the appetizer. It makes a sound that starts. Only no ignition. Should I be able to see a spark? Quote: Is your coach battery fully charged? It supplies the power to the igniter. Just a thought. Maybe try idling the engine while you try lighting the fridge or plugging into shore power. Another thought? Oh. I thought the igniter was a self-contained unit, like on a BBQ grill. I'll try your suggestion and plug into power when I go to light it. Quote: If none of this helps, have a look at the trouble shooting manual link, and get service if all else fails. Wish I could be more help. I feel your frustration. It's often part of the RV experience. Yep, that's pretty much where I'm at. You've been very helpful, though. Even if we didn't fix the problem. Thanks. À Á 07-27-2014, 09:21 PM À Á #19 Platinum Member À Á À Á Join Date: Aug 2008 Location: Sarnialabad, The Newly Elected People's Republic of Canuckistan Posts: 3,239 Re: Dometic RM2310 re: igniter power. My bad. I see they mention a piezo igniter on page 7 of the RM2310 install/owner's manual under the "Gas Operation" heading. Mine also has a piezo igniter as it's almost as old as yours. Don't know why I was thinking DSL. The little window on yours is the observation port for successful ignition. Not getting much use so far? My model has the operational status window/meter. Sorry. It's not a sprin(ter) (unless you make it one), it's (hopefully) a marathon.
